

DASHING TWEEDS

AW23 COLLECTION

Life is nothing without stories. Once you know the provenance of something it takes on a whole new value. Learning about the creativity and love bestowed on a length of cloth for example, makes it so much more desirable and valuable. Life is too short to throw away on the inconsequential, and with this in mind you'll love the story of our new tweeds.

Whilst exploring Mexico last summer I was struck by the way historical layers of culture combine with the naturally vibrant landscape to create a cacophony of colour and delight. In terms of design, everything seemed to be considered and throwaway attitudes did not prevail. We've taken ideas from my inspirational trip and added yet another layer to the story. We've woven the narrative of the trip into wool cloth using looms in the Scottish Borders and a range of British spun yarns.
